EDUCATION

Sahyadri College of Engineering and Management

Bachelors of Engineering (B.E.) - Computer Science Engineering

Course work: Data Structures & Algorithms, Operating system, Computer Networking, DBMS

Mangalore, Karnataka

June 2020 - July 2024

EXPERIENCE

Sophize Technologies | Full Stack Developer

January 2025 - Present

- Designed and developed dynamic, responsive UI components using **Next.js**, **React Flow**, and **TypeScript**, improving user task completion rates by **35%**.
- Built scalable full-stack applications with **Node.js** REST APIs, optimizing data flow and achieving **25%** faster response times across core services.
- Integrated interactive flow-based diagrams via **React Flow**, increasing process visualization efficiency by **40%**, enhancing end-user engagement and operational clarity.
- Conducted detailed code reviews and performance audits, reducing critical page load times by **30%** and ensuring 99.5% UI uptime across deployments.

EvolvuteIQ | Software Trainee Intern

February 2024 - April 2024

- Designed and delivered **user-friendly interfaces** using the EvolvuteIQ platform, improving UI/UX consistency and reducing user friction by **25%**.
- Gained hands-on experience with **EvolvuteIQ's low-code automation platform**, completing over **10+ module assignments** and contributing to process optimization initiatives.
- Developed a **Project Management System** as a capstone project, streamlining resource allocation and showcasing **100%** platform proficiency.
- Collaborated in agile teams to meet **weekly sprint goals**, enhancing cross-functional communication and ensuring **on-time delivery** of project milestones.

PROJECTS

Smart Automation Anti-Violence Intervention Software | [Github](#)

Python, TensorFlow, OpenCV

- Developed a real-time violence detection system using **TensorFlow** and **OpenCV** on CCTV feeds, enabling automated identification of potential threats with **90% accuracy**.
- Automated instant alert notifications to police departments using a **Telegram bot**, achieving response times under **5 seconds**.
- Reduced manual surveillance workload by **80%** by deploying AI-powered models for continuous, real-time monitoring and automated interventions.

Travelers Website | [Github](#)

HTML, CSS, PHP, JavaScript

- Developed a real-time vehicle tracking and booking platform, reducing rental booking process time by **40%** and enhancing service efficiency.
- Implemented location-based services and dynamic booking dashboards, improving user engagement by **20%** through streamlined rental operations.
- Participated in an **ISRO hackathon**, integrating real-time location data into the platform and demonstrating innovative use of tracking systems.

Clippy | [Github](#)

Next.js, Typescript, NextUI, MongoDB, Uploadthing

- Created an innovative **online clipboard tool** that streamlines copying, pasting, and file sharing tasks. Optimizing document management and improving access to **shared resources**, Clippy enhances user productivity by **45%**.
- Crafted a **scalable solution** with Next.js, TypeScript, and MongoDB, integrating UploadThing for file management, resulting in a **30% faster page load** experience. [Try it!](#)

TECHNICAL SKILLS

Programming Languages:	Java, JavaScript, TypeScript, CSS, SQL
Frameworks/Libraries:	React.js, Node.js, Next.js Express.js
Databases:	MySQL, MongoDB
Developer Tools:	Git, VS Code

LEADERSHIP EXPERIENCE & ACHIEVEMENTS

- Final year project **funded by Government of Karnataka**, selected for **state-level exhibition** in Bengaluru.
- Secured **2nd place** in SOSC Hackathon at Sahyadri College of Engineering and Management.
- Participated in **TEKEQ-2024 Project Exhibition** at Sahyadri College of Engineering and Management.
